A gross error in the construction of space affects multiwords and multiverse. Example: constructing a space on;  $x, y, z; -x, -y, -z$ .  
If:  $x \wedge y \wedge z$  is correct, and  $-x \wedge -y \wedge -z$  is admissible, then  $x \wedge y \wedge -z; x \wedge -y \wedge z; -x \wedge y \wedge z$ , exist only in mathematics, and are the paradoxes of logic - the point of mathematical logic.
